

**Remarks/Arguments:**

The applicant would like to thank the examiner for the telephonic interview on March 31, 2009, in which the claims and the prior art were discussed.

The above Amendments and these Remarks are in reply to the Office Action mailed January 23, 2009.

Claims 1, 3-21, 23-42 and 44-51 are rejected under 35 U.S.C. 102(e) as being anticipated by Aggarwal et al. (U.S. Publication No. 2004/0205566).

The independent claims have been amended to include the features from canceled claims 5 and 7. The claims now read that “the web page group includes application logic that is separate from logic related to rendering a graphical user interface; and wherein the web page group stores a state of the pages in the group”. This added feature is not shown or made obvious by the cited prior art.

The independent claims have also been amended to state that “the web page group stores the state of the pages using annotated variables”. This additional feature is not shown or made obvious by the cited prior art and is supported in paragraph [0041] of the present invention’s published application.

In light of the above, it is respectfully submitted that all of the claims now pending in the subject patent application should be allowable, and a Notice of Allowance is requested. The Examiner is respectfully requested to telephone the undersigned if he can assist in any way in expediting issuance of a patent.

The Commissioner is authorized to charge any underpayment or credit any overpayment to Deposit Account No. 06-1325 for any matter in connection with this response, including any fee for extension of time, which may be required.

Respectfully submitted

Date: April 30, 2009
